TNT Electronic Services

In today's fast moving business environment people expect better and more responsive services. That's why we have developed a full range of internet, pc-based and mobile services that make shipping easier and more efficient.

Whether you require simple tracking, pricing and booking/ordering tools, or an automated shipping solution that integrates with your IT systems, we can help you.

TNT Electronic Services

myTNT

Easy shipping management online

TNT

sure *we can*

online and on time

The internet shipping program that lets you manage and monitor every package you send. There is no more convenient and secure way of making sure that your customers receive your consignments rapidly and reliably.

Advanced shipping for everyone

myTNT is a flexible and personalised shipping program that you manage online. It gives you access to TNT's global network whether you're a regular or infrequent shipper.

Simple and personalised

With myTNT you enter the details and book your shipments yourself. And it's as easy as booking a flight online. You can also customise your online environment so that it's geared to your requirements. For instance, you can personalise and store addresses for regular shipments and also view your own rates.

Right place, right time, right price

Once you have entered the shipment details, you are automatically given a choice of services with your own rates for those services. You then select your preferred delivery time, service and collection time that suits you.

Moreover, you can print and sign documentation before pick-up. TNT can also send an email confirmation of your collection request.

Peace of mind

A track and trace function that allows you to keep your shipment through its journey anywhere in the world. You can even send an Advanced Shipping Notification to the receiver and to all interested parties.

Multi-user access and detailed reports

Different users can access the same myTNT account, or different departments/users can have their own account. You also have the option to either share your address book and shipping manager across users or have it secured

all to yourself. You can even prepare the shipment in one location and print it elsewhere, another office or warehouse for instance. The advanced Shipping Manager allows you to:

> bring up detailed reports of your shipment history
> create a 'Summary Manifest' so that you don't have to sign every shipment

All this from your own computer, or from your laptop when you're on the move! No wonder myTNT is our most popular online service.

Free, easy and secure

myTNT involves no software installation and is hosted in a secure web environment. Setting up and opening an account is free and supported by our online technical support team. Suitable for PC and Mac.

Find out more at www.tnt.com

You will find more information about Electronic Services on the TNT website. Alternatively, contact your local TNT representative to help you select the ideal services and solutions for your needs.

Sure we can.
